

LED REAR LIGHTS

FARMI FOREST FLEXIBLE LED –REAR LIGHTS FOR ALL KIND OF TRAILERS

Now you can forget the annual rear light repair work for your tractor-trailers. **Farmi Forest Co from Finland** has put on the market a new series of long lasting heavy duty rear lights which work perfectly in all weather conditions. These super lights are cast rubber and so they will flex under all kinds of loads. They will even work under water or in very low temperatures (in Finland we can have have even -40 Celsius during the winter). These lights are so strong that you can even drive over them by a tractors without damaging them. LED lamps have a lifetime of up to 14000 hourscontinuous use. These LED rear lights are easily fitted to all kind of trailers (as well to car trailers).

Check these lights out for yourself. Go on YouTube page:
<http://www.youtube.com/watch?v=rKXp03n6h58>.

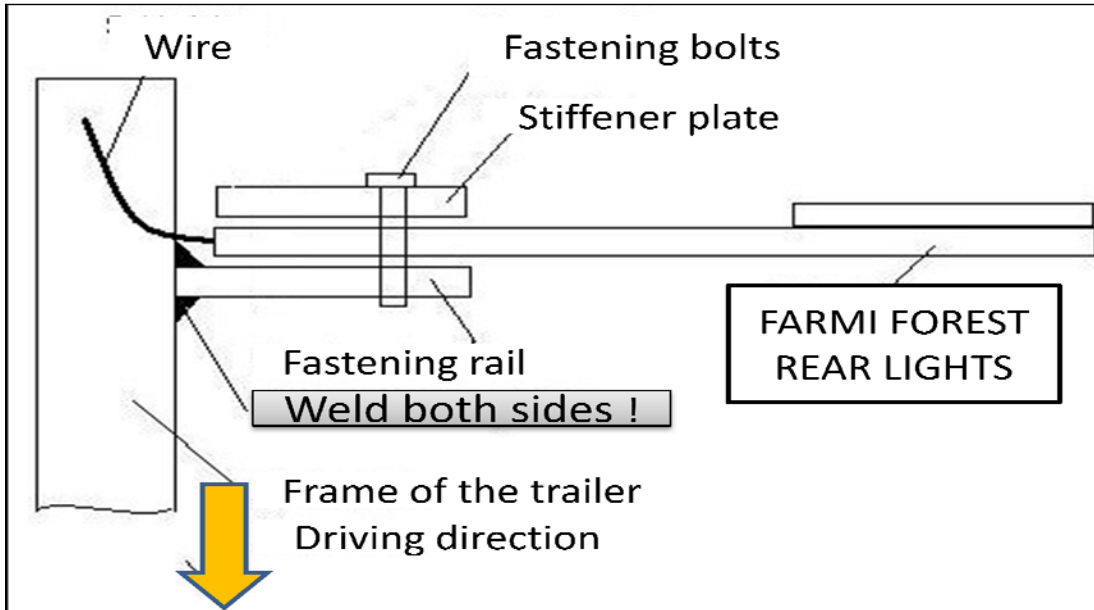

Usage targets:

- forest trailers
- earthmoving trailers
- other trailers
- car trailers

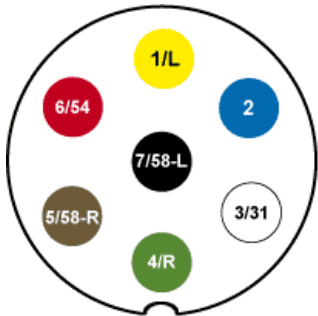

FARMI FOREST LED –rear lights flex and and last under all kinds of loads

Fasten the light according to the picture below:

Connect the wiring by following the table and picture below:

Plug pin Nro	Colors for the cables (standard)	Function	Colors for wires in LED lights
1	Yellow	Left blinker	Yellow
2	Blue	Free or foglamp	Free
3	White	Earthing	White
4	Green	Right blinger	Yellow
5	Brown	Rear light (right)	Brown
6	Red	Brake light	Green
7	Black	Rear light (left)	Brown

Push the ends of wires into the connector so that they are overlapping. Heat the connector by the hot-air heater as long as the tin melts and the plastic connector shrinks tightly around the wires. (connect the wires of the LED lights to the thinner end of the connector!)
